   a) Formal                    b) Functional
   c) Perceptual                d) Geographic

4) _____ Lines on a map running from north to south but measuring east to west are called:
   a) Longitude lines           b) Latitude lines

5) _____ Lines on a map running from east to west but measuring north to south are called:
   a) Longitude lines           b) Latitude lines

6) _____ In general, what type of climate is found in locations with high latitudes?
   a) Mild                      b) Cold
   c) Hot                       d) Hot and Dry

7) _____ What is the name for zero degree latitude?
   a) Tropic of cancer          b) Equator
   c) Prime Meridian            d) Base Meridian

8) _____ The _________________ is the minute by minute changes in the atmosphere.
   a) climate                   b) weather
   c) short term climate        d) geography

9) _____ What landform is described below:
   -Land 500-200 feet in elevation, formed by a stream of erosion
   a) Hills                     b) Escarpments
   c) Rivers                    d) Volcanic Mountain

10) _____ What landform is described below:
    -a sheer steep rock cliff
    a) Hills                    b) Escarpments
    c) Rivers                   d) Volcanic Mountain
11) ______ What landform is described below:
-Land that is completely surrounded by water
   a) Isthmus  b) Peninsula
c) Island  d) Strait

12) ______ What landform is described below:
-land that is surrounded on 3 sides by water
   a) Isthmus  b) Peninsula
c) Rivers  d) Volcanic Mountain

13) ______ What landform is described below:
- a narrow strip of land connecting two larger bodies of land
   a) Peninsula  b) Strait
c) Rivers  d) Isthmus

14) ______ What landform is described below:
- areas between ranges of mountains, hills, or uplands.
  - Often created by erosion
   a) Isthmus  b) Peninsula
c) Escarpment  d) Valley

15) ______ The Hawaiian Islands are examples of what landform?

   a) Peninsula  b) Strait
c) Delta  d) Archipelago

16) ______ At the mouth of major rivers you might find this landform

   a) Tributary  b) Delta
c) Escarpment  d) Isthmus
17) The arrow below points to what water based feature?
   a) River  
   b) island  
   c) Gulf or Bay  
   d) Strait

18) A stream which runs into a river or lake is called a/an:
   a) Delta  
   b) Tributary  
   c) Tideland  
   d) Current
