   a) Perceptual  b) Formal
   c) Functional  d) Geographic

4) ______ Lines on a map running from north to south but measuring east to west are called:
   a) Latitude lines  b) Longitude lines

5) ______ Lines on a map running from east to west but measuring north to south are called:
   a) Latitude lines  b) Longitude lines

6) ______ In general, what type of climate is found in locations with high latitudes?
   a) Mild  b) Hot
   c) Cold    d) Hot and Dry

7) ______ What is the name for zero degree latitude?
   a) Tropic of cancer  b) Base Meridian
   c) Prime Meridian d) Equator

8) ______ The ____________ is the minute by minute changes in the atmosphere.
   a) climate  b) geography
   c) short term climate d) weather

9) ______ What landform is described below:
   -Land 500-2000 feet in elevation, formed by a stream of erosion
   a) Volcanic Mountain  b) Escarpments
   c) Rivers  d) Hills

10) ______ What landform is described below:
    -a sheer steep rock cliff
    a) Hills  b) Rivers
    c) Escarpments  d) Volcanic Mountain
11) ______ What landform is described below:
   - Land that is completely surrounded by water
     a) Isthmus
     b) Peninsula
     c) Island
     d) Strait

12) ______ What landform is described below:
   - Land that is surrounded on 3 sides by water
     a) Isthmus
     b) Rivers
     c) Peninsula
     d) Volcanic Mountain

13) ______ What landform is described below:
   - A narrow strip of land connecting two larger bodies of land
     a) Peninsula
     b) Strait
     c) Isthmus
     d) Rivers

14) ______ What landform is described below:
   - Areas between ranges of mountains, hills, or uplands.
     - Often created by erosion
     a) Isthmus
     b) Valley
     c) Escarpment
     d) Peninsula

15) ______ The Hawaiian Islands are examples of what landform?

   ![Hawaii]

   a) Archipelago
   b) Strait
   c) Delta
   d) Peninsula

16) ______ At the mouth of major rivers you might find this landform

   ![River Mouth]

   a) Tributary
   b) Isthmus
   c) Escarpment
   d) Delta
17) ______ The arrow below points to what water based feature?

- River
- Island
- Strait
- Gulf or Bay

18) ______ A stream which runs into a river or lake is called a/an:

- Tributary
- Delta
- Tideland
- Current

19) ______ Water body that flows to the ocean is called a/an:

- Lake
- Tributary
- River
- Stream

20) ______ A narrow water passage between two areas of land is called a/an:

- Isthmus
- Archipelago
- Strait
- Plateau

Questions 21-25: List the 5 Themes of Geography

- Place
- Place
- Place
- Place
- Place
